Education

Jaypee Institute of Information Technology

Noida, India

Bachelor of Technology - Computer Science; CGPA: 7.69

Jul 2023 – May 2027

- **Core Coursework:** Data Structures & Algorithms, Object Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering, Web Services.

Experience

Imagine Pharma Solutions

Mar 2026 – Apr 2026

Frontend Developer (Freelance)

Remote

- Developed and deployed a production-ready website using **React, Vite, and Tailwind CSS**.
- Built responsive UI with smooth navigation using **React Router** and **Framer Motion**.
- Created **reusable components** for scalable frontend architecture across multiple pages.
- Deployed via **Vercel** ensuring reliable hosting and optimized performance.

Projects

Cloud Distributed Storage System [\[View Project\]](#) | Python, Flask, PostgreSQL, AWS S3

Mar 2026 – Apr 2026

- Built a secure forensic evidence storage platform with **AES-256 encryption** and **SHA-256 hashing** for tamper-proof integrity.
- Designed a **chain-of-custody tracking pipeline** with audit logs and **blockchain-based verification** for immutable records.
- Developed **RESTful APIs** with **role-based access control** supporting multi-user workflows across forensic and legal roles.
- Implemented pluggable storage with **PostgreSQL (Supabase)** and **AWS S3** for scalable data persistence.

Ocean Level Rise Detection System [\[View Project\]](#) | Python, LSTM, XGBoost, SARIMA

Oct 2025 – Nov 2025

- Built a **multi-model time-series forecasting pipeline** to predict sea-level changes across coastal cities.
- Engineered preprocessing and **feature extraction workflows** enabling model training across multiple datasets.
- Evaluated models using **MAE and RMSE**, identifying **XGBoost** as the most accurate across cities.
- Developed an interactive **Streamlit dashboard** with visualizations, forecasts, and risk alerts.

RAG-Based Chatbot [\[View Project\]](#) | Python, LangChain, ChromaDB, LLM, Ollama

Jan 2026 – Feb 2026

- Built a **Retrieval-Augmented Generation (RAG)** pipeline for querying custom knowledge bases.
- Implemented **document ingestion, chunking, embedding generation**, and vector search.
- Integrated **LLM inference via Ollama** to generate context-aware responses with reduced hallucination.
- Designed **modular architecture** for scalability and future API deployment.

Technical Skills

Languages: C, C++, Python, JavaScript, HTML, CSS

Frameworks and Libraries: React, Node.js, Express.js, Flask, LangChain, Scikit-learn, TensorFlow

Database: MySQL, PostgreSQL, MongoDB, Redis, SQLite

API and Networking: RESTful APIs, WebSockets

Developer Tools: Git, GitHub, Docker, Linux, Vercel, Streamlit, Jupyter Notebooks

Skills: Data Structures and Algorithms, Machine Learning, Web Development, GenAI, Time-Series Forecasting

Achievements

Winner – BITBOX 6.0 Hackathon

Apr 2026

- Built a decentralized blockchain security system for detecting smart contract vulnerabilities using static analysis and fuzzing.
- Designed real-time threat monitoring with mempool analysis and on-chain risk scoring for detecting malicious transactions and high-risk contracts.

Positions of Responsibility

Eloquence Literary Society, JIIT

Noida, India

Core Team Member

Sep 2023 – May 2025

- Led coordination and execution of major college events, ensuring smooth operations across logistics and team management.

Parola, JIIT

Noida, India

Core Member – Management Team

May 2025 – Present

- Coordinated logistics for **JOUST Fest** across multiple teams, managing event operations and participant coordination.
